BCON × ZENSQUARE · WHAT THIS SHOWS

The IGCSE market, in five lines

Reach parents of strong IGCSE students in the cities that search most, before the January peak.

1. **Demand is south and west**
   Maharashtra, Tamil Nadu, Karnataka and Telangana search for IGCSE the most.

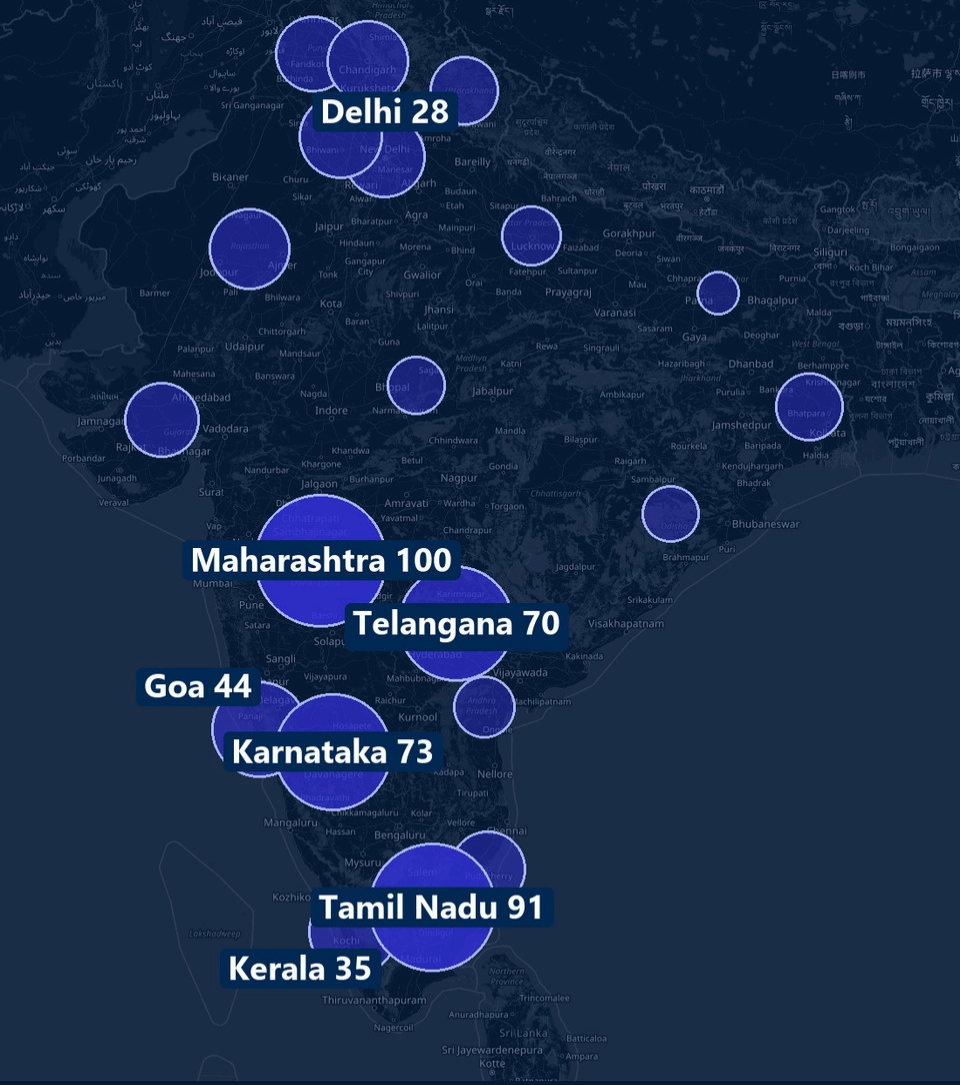

2. **January and February are the peak**
   Searches climb before the exam series and are lowest in June.

3. **Meta is busy**
   About 980 live ads mention IGCSE, mostly tutoring for every board with a free demo.

4. **Google clicks cost ₹55 to ₹220**
   The paid spots lead with percentages and ratings.

5. **Your edge is A★**
   Advanced tutoring for A and B students, named specialist tutors, and the Grade 9 university angle.

What gets ads pulled

Meta and under-18s
Advertisers can't target teenagers by interests, only by age and location. Ads that speak to parents avoid the problem.

Claims about results
India's ad code (ASCI) asks education ads to back up claims about results and toppers, and to have consent for names and photos.

University names and crests
They belong to the universities. Use them as goals, never in a way that suggests a tie-up.

Guarantees
No guaranteed grades or admissions. Your FAQ already says no one honest can.

Many ads in this market lean on percentages and university logos. Keeping to real tutors and a clear method stays safe.
